Phosphate licks for Ruminants

1. Green season (rainy season)

Green pastures are normally deficient in minerals for optimal animal production. The limiting nutrients that are supplemented by mineral licks are phosphate and trace minerals.

Mineral licks for cattle, sheep, goats and game

Item	Kimtrafos 12 Grandé	PhosSure12
Kimtrafos 12 Grandé	500	-
PhosSure 12	-	500
Total	1000	1000
Composition	Composition	Composition
Ca (%)	12	12
P (%)	6,0	6.0
S (%)	5,0	5.0
Intake, g/ day (cattle)	100 - 240	100 - 240
Intake, g/ day (sheep & goats)	18 - 36	18 - 36
Intake, g/kg BW*/day (game)	0,6	0.6

* BW = Body Weight
